

Screen 1

On selection, opens Bookings page - see screen on page ...

On selection

On selection

On selection

If user selects "Departure" or "Destination" drop down lists will be shown. See screens 4 & 6

If user selects "Depart" or "Return" - calendars with available dates will be shown. See screens 8 & 9

If "Return Trip" or "One Way" is selected, the selected button with turn grey - see screen 2

On selection, user can select the number of passengers (see screen 10)

If the user selects "One Way" then the text in both "Destination" and "Return" will turn #727171 and cannot be clicked on (See screen 3)

When clicked, if the user has filled in all data, will bring user to flight results (see screen 13). If data is not completed, the incomplete section will be highlighted.

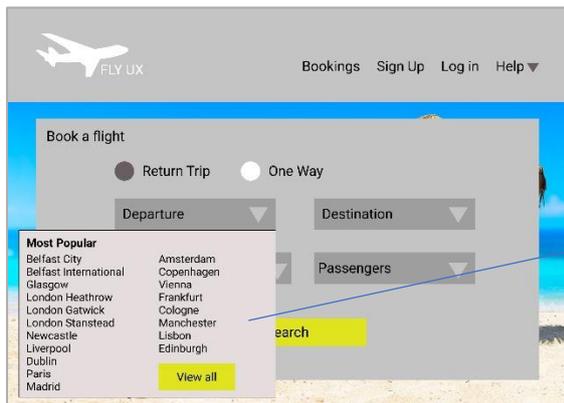

Screen 2

If "Return Trip" or "One Way" is selected, the selected button with turn grey

Screen 3

If the user selects "One Way" then the text in both "Destination" and "Return" will turn #727171 and cannot be clicked on

Screen 4

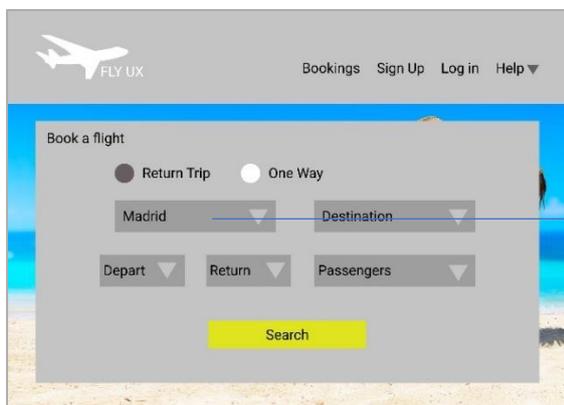

If user selects "Departure" a drop-down list is shown with the "Most Popular" departure airports.

They can also click on "View all" which will expand the drop-down list to show all available departure airports in a list.

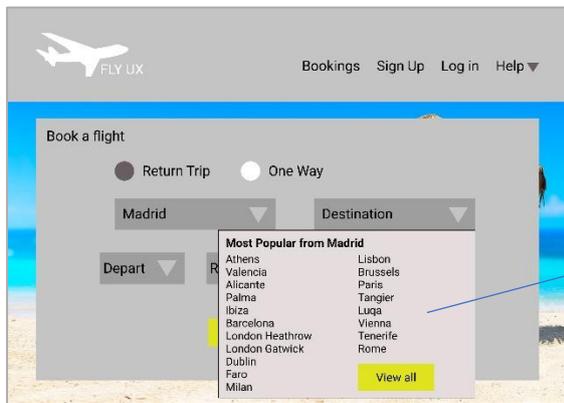

When the user selects a departure point by clicking on the name, the name will be shown in the box (see screen 5)

Screen 5

When the user selects a departure point by clicking on the name, the name will be shown in the box

Screen 6

If user selects "Destination" a drop-down list is shown with the "Most Popular" destination airports from the selected departure airport.

They can also click on "View all" which will expand the drop-down list to show all available destination airports in a list.

When the user selects a destination point by clicking on the name, the name will be shown in the box (see screen 7)

Screen 7

When the user selects a destination by clicking on the name, the name will be shown in the box

Screen 8

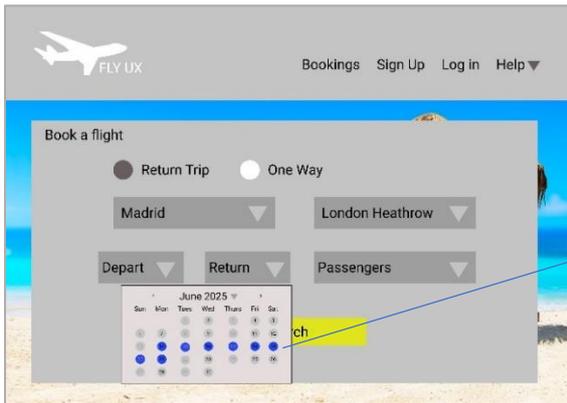

When the user clicks on "Depart" a calendar with available departing dates is shown. The user can then click on which date they want to depart. Once they click on a date, they are immediately moved onto the return section which can be seen on screen 9.

The month can be changed by hitting the drop down box or clicking on the arrows on either side.

Screen 9

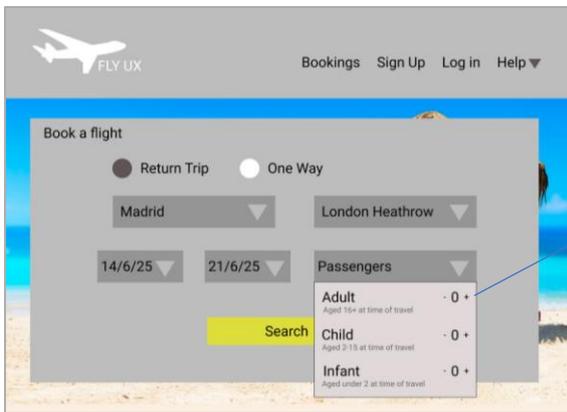

When they are moved onto the return section, their selected departure date will be highlighted blue and they can only click on dates after this date as their return date.

Screen 10

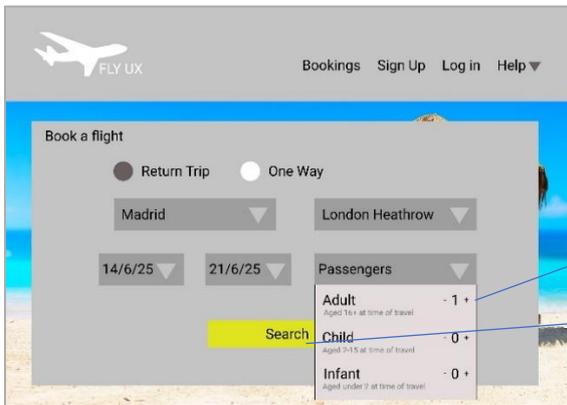

When departure and return dates are both selected, the trip duration is then highlighted.

Screen 11

When the user clicks on "Passengers" a drop-down list will show the different passenger types and what the criteria is for each type.

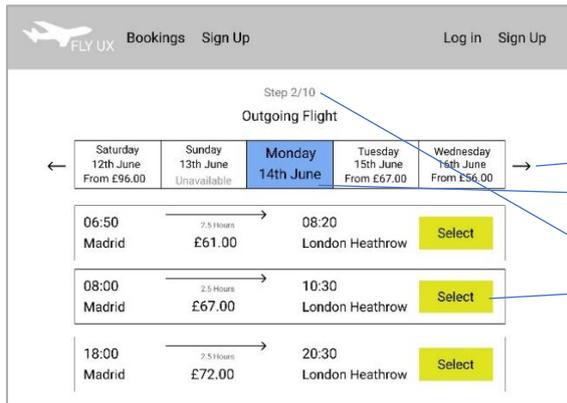

Screen 12

Numbers of passengers can be added by clicking on the + button and removed with the - button. The number will adjust according to this.

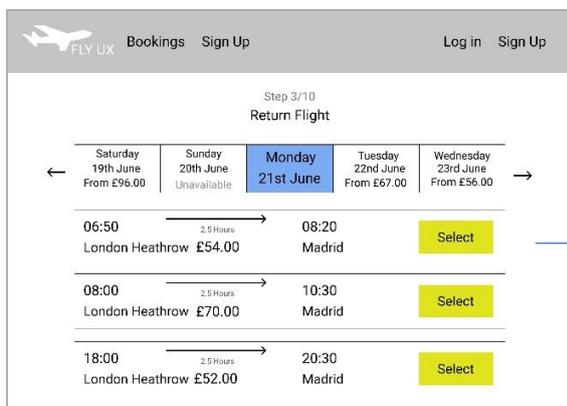

When the search button is clicked, if the user has filled in all data, it will bring user to flight results. If data is not completed, the incomplete section will be highlighted.

Screen 13

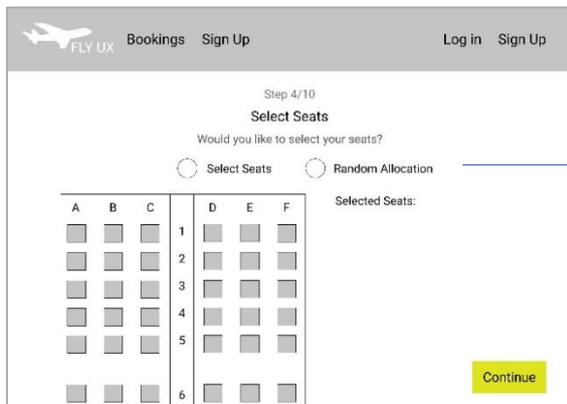

The user will be shown outgoing flights for the date they picked.
 They will also be shown dates and prices for flights on 2 days either way. They can look further by clicking on the arrows.
 The day of which they are looking at flights is highlighted.
 The flights are shown in order of departure time.
 When they press select on the flight, they want they are brought to pick their return flight (Screen 14)
 Step number increases with each process the user goes through

Screen 14

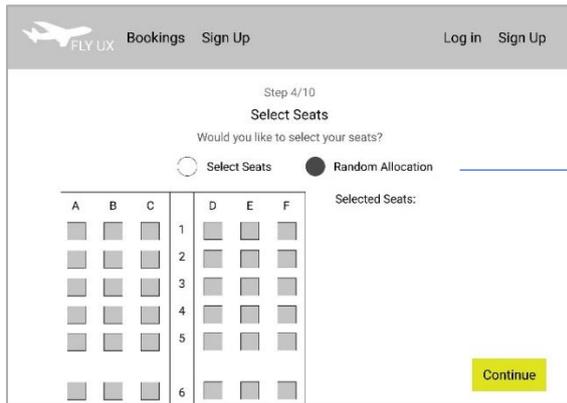

This screen works in the same way as Screen 13.
 When they press select on the flight they want they are brought to select their seats (Screen 15)

Screen 15

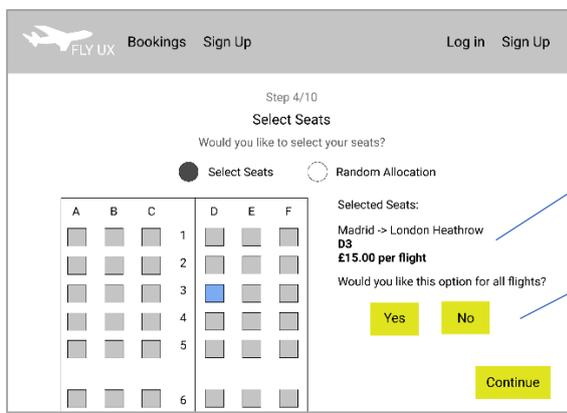

The user can pick to select their seats or random allocation. The option they pick will change the colour of its associated circled (See screen 16)

Screen 16

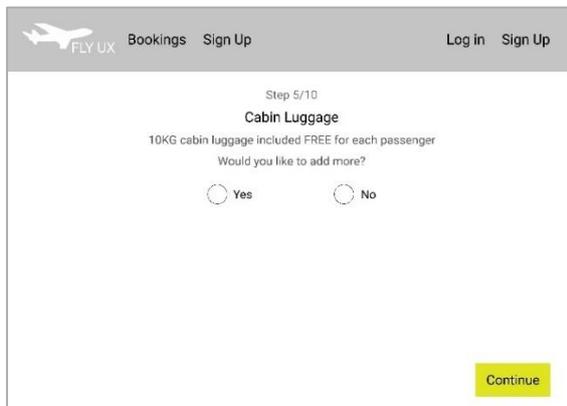

If the user selects Random Allocation, this option will be coloured and they can then press continue to the next step

Screen 17

If the user selects Select Seats, they can then choose their seat.
 The seat will be highlighted and its details including price will be shown to the right.
 If the user has chosen a one-way flight, they can continue to the next step – they will not be shown the option to add to all flights.
 If the user has chosen a return flight they will be shown the option to select this seat for all flights.
 If they select yes, they will be shown the details for both flights and can continue to the next section.
 If they select no, they can choose a different seat for the return flight and then continue.

Screen 18

The user can select if they want more cabin luggage.
 If they select "Yes" and continue, they will be shown screen 19.
 If they select "No" and continue, they will be continued to the next step – screen 21.
 The selected option will be coloured.

Screen 19

If the user has selected "Yes" they will be shown the options and prices available.

Screen 20

When they select an option, it will be highlighted, and they can press continue to move onto the next step.

Screen 21

The user can select if they want to add hold luggage.

If they select "Yes" and continue, they will be shown a screen similar to screen 19 but with different weights and prices.

If they select "No" and continue, they will be continued to the next step – screen 23.

Screen 22
